Sorted - Year 1 & 2 Investment and Financial Breakdown

This document outlines the expected initial investment requirements and operational projections for the first two years of Sorted and GardensSorted. The objective is to fund platform build, launch operations, customer acquisition, and initial scaling until recurring revenues support operational expansion.

Initial Investment Requirements

Initial Investment Area	Estimated Cost (£)
Platform Design & Development	40,000
Infrastructure & Hosting Setup	5,000
Branding & Website Assets	5,000
Legal & Compliance	7,500
Initial Marketing Launch Budget	25,000
Operational Contingency	10,000
Initial AI & Software Services	5,000
Working Capital Reserve	20,000
Total Initial Investment	117,500

Operational Projection Summary

Metric	Year 1	Year 2
Customers	1,000	3,500
Annual Revenue	£720,000	£2,520,000
Provider Costs	£432,000	£1,512,000
Marketing Spend	£108,000	£378,000
Operational + AI Costs	£84,000	£294,000
Payment Processing	£21,600	£75,600
Estimated Gross Profit	£74,400	£260,400

Key Financial Observations

• Year 1 investment is focused primarily on platform development, customer acquisition, and operational launch.
• The business model benefits from recurring subscription revenue and contractor-based workforce scaling.
• Provider costs scale proportionally with customer growth while fixed staffing overhead remains relatively low.
• AI-assisted operational management is expected to significantly improve scalability over time.
• From Year 2 onwards, growth is expected to become increasingly self-funded through recurring revenue generation.
