

# Sorted - Financial Overview (High Level)

Sorted is designed as a recurring subscription-based managed marketplace for home services, beginning with GardensSorted. The operational model focuses on scalable recurring revenue, AI-assisted operations, contractor-based service delivery, and locality density optimisation.

| Key Metric                   | Value                   |
